WORK EXPERIENCE

Backend developer, Webim
Aug 2019 - Oct 2019   ⏲ 2 months

Migrated project to Python 3

- Resolved dependency conflicts
- Found alternatives to deprecated libraries
- Implemented integration through third-party services (OAuth, SMS)

SKILLS

Python: Django, numpy, pandas, sklearn, xgboost, PyTorch.

Java: Spring, collections, concurrency.

C++: STL, smart pointers, move semantics.

Haskell: DSL, applicative parsers, multithreading.

Algorithms and data structures: sorting algorithms, basic data structures, trees, graph algorithms, cryptography.

Machine learning: KNN, GD, SVM, DT, FS, CNN, RNN, GAN, RL.

Also worked with: **Kotlin**, **Javascript**, **SQL**, **Bash**, **Make**.

EDUCATION

Third-year, Computer science, ITMO
Sep 2017 - Jul 2022

ABOUT

Studying algorithms and mathematics in depth.

Interested in data science, distributed systems, and programming language theory.

LANGUAGES

English – Advanced

Russian – Native
